Green-e Certified

Green-e is the nation's leading independent certification and verification program for renewable energy and greenhouse gas emission reductions in the retail market. The Green-e logo identifies products made with certified renewable energy, including but not limited to wind power, solar power, low impact hydropower, and biomass.

- **ENVIRONMENT® Papers**
 - ALL colors in ENVIRONMENT® Papers
- **CLASSIC CREST® Papers**
 - ALL colors in CLASSIC CREST® Papers

Alternative Fiber

Alternative fibers are no-tree substitutes for papermaking and include sources such as bamboo and sugar cane bagasse, which require fewer chemicals and less energy for processing than virgin tree fiber.

- **ENVIRONMENT® Papers (50% sugar cane / 50% post consumer fiber)**
 - Tortilla, Mesa White
- **EVERGREEN® Papers (50% bamboo / 50% post consumer fiber)**
 - Balanced White, Soft White

Carbon Neutral

As a member of the Chicago Climate Exchange, Neenah Paper has achieved Carbon Neutrality through net reductions in greenhouse gas emissions. These methods include but are not limited to the use of Green-e certified renewable energy and other renewable energy sources, and the implementation of energy saving upgrades.

- **CLASSIC CREST®, CLASSIC® Laid, CLASSIC® Linen, CLASSIC COLUMNS®, CLASSIC COTTON® Papers**
 - ALL colors
- **STARWHITE® Papers**
 - ALL colors

Green Seal

Signifies that all of our recycled papers are made with a minimum of 30% post consumer fiber and that mill processes, including packaging, are environmentally preferable.

Additional

Special Requests: We also have the capability to manufacture custom makes in 100% post, FSC Certified or Green-e Certified. Minimums are required.

Environmental Savings Data can be provided to show savings such as trees, water, energy, etc. saved by using any of Neenah's environmental offering. Visit www.neenahpaper.com to use the paper calculator.

Above & Beyond

Neenah paper also converts all of its wastewater sludge into green steam energy, reducing natural gas consumption by 80% annually and by doing so, virtually eliminates materials going to landfills.
