

## The right logo for the job

The FSC label can only be arranged with an FSC-certified printer when using FSC-certified paper purchased through an FSC-certified merchant. Be sure to build some extra time into your production schedule when you want to include this logo on your job. The FSC logo has five variations and very strict usage rules. If you do not use an FSC-certified printer, your job cannot carry any FSC logo or language.

### FSC 100% Recycled

Products with this 100% Recycled label support re-use of forest resources and in accordance with FSC standards only use postconsumer recycled wood or fiber.

### FSC Mixed Sources (forests, controlled sources and recycled fiber)

Products with a Mixed Sources label support the development of responsible forest management worldwide. This label is used when a customer orders a grade that includes fiber from FSC-certified well-managed forests as well as recycled fiber and/or fiber from non-FSC-certified company controlled sources. The optional recycling symbol identifies postconsumer recycled content in these grades.

### FSC Mixed Sources (forests and recycled fiber)

Products with this Mixed Sources label support the development of responsible forest management worldwide. This label is used when a customer orders a grade that includes fiber from FSC-certified well-managed forests as well as recycled fiber.

### FSC Mixed Sources (forests and controlled sources)

Products with this Mixed Sources label support the development of responsible forest management worldwide. This label is used when a customer orders a grade that includes fiber from FSC-certified well-managed forests and/or fiber from non-FSC-certified company controlled sources.

### FSC 100% Virgin Fiber Label

Products with a 100% FSC label come from forests certified as being in compliance with the environmental and social standards of the Forest Stewardship Council (FSC).

Landscape versions of these logos are also available. See your FSC-Certified printer for details on using the FSC label.
